

## ALISHBA IKHLAQ

+92 304 8530838 | [alishbaikhlaqshah@gmail.com](mailto:alishbaikhlaqshah@gmail.com) | Karachi, Pakistan

### EDUCATION

**Usman Institute of Technology (UITU), Karachi**

March 2023

*BS Software Engineering*

**Major(s):** AI, Computer Networks, PQC Encryption Algorithms, Cryptography, Software Engineering Principles, DIP.

**CGPA:** 3.15

### CERTIFICATIONS

- **Udemy:** R-Programming Diploma, Understanding Sustainable Development Goals, Machine Learning with Python A to Z.
- **Google:** Soft Skill Program
- **CISCO:** Networking Basics, Introduction to Cybersecurity

### EXPERIENCE

**ISPR** | Karachi, Sindh

Jan 2026 – Feb 2026

*Intern*

- *Evaluated AI's role in hybrid warfare by analyzing digital trends and technical vulnerabilities to counter misinformation.*
- *Developed strong presentation and leadership skills.*

**Electronics Art** | Remote, (Job Simulation)

June 2025 – July 2025

*Software Engineer Intern*

- *Proposed a new feature for EA Sports College Football and documented it for stakeholders.*
- *Designed class diagrams, created C++ header files, and optimized the codebase with improved data structures.*

**Walmart Global Tech** | Remote, (Job Simulation)

Jan 2025 – Feb 2025

*Software Engineer Job simulation*

- *Built a custom heap data structure in Java for the shipping department, enhancing efficiency.*
- *Designed UML class diagrams and ERDs to model multi-mode data processors and pet department databases*

### LEADERSHIP ACTIVITIES & PROJECTS

**APQ-Crypt (Adaptive post-quantum & classical cryptography framework | ongoing)**

- *Developing a simulation based adaptive cryptography framework using machine learning and post-quantum cryptographic algorithms to enhance network security and resource efficiency.*

**Secure Cloud Backup & Disaster Recovery (Research Paper)**

**Dec 2025**

- *Led a team of 2 members in developing a secure disaster recovery framework using HSDRT and encryption, which resulted in improving recovery speed and reducing system downtime through optimized backup strategies.*

**Sparse Matrix Analyzer (Python, Matplotlib, tkinter)**

**Nov 2025**

- *Collaborated with a team of 4 members to develop conversion modules and test cases for a Python-based sparse matrix analyzer, enabling efficient matrix operations and performance benchmarking. Resulted in improved analysis efficiency with 90% accuracy through visualization and memory profiling of sparsity patterns.*

**AI Timetable Generator (Python, ReactJS, Tailwind CSS, Flask)**

**Jun 2025**

- *Contributed to data preprocessing, cleaning, and backend constraint module development for an AI timetable generator using Python, Flask, ReactJS, and Tailwind CSS. Resulted in clash-free scheduling automation with 80% reduction in manual effort.*

**Internfy (Python, Flask, HTML, CSS, SQLAlchemy + SQLite, PYPDF2, Pandas, Matplotlib)**

**Sep 2025**

- *Independently developed a full-stack platform with role-based access, ATS-powered resume screening, auto generated cover letters, and data-driven dashboards for students, companies, and admins.*

**Technical:** Oracle, Kali Linux, Linux, Packet tracer, PLS-SEM, Figma, Docker, Kubernetes, AWS, s C/C++, Java, Python, SQL, JavaScript, PHP.
